

# MistBLASTER®

Mist Collection System

Manufactured by **ChipBLASTER®**  
"The World's Best High Pressure Coolant Systems"

Our **New** MistBLASTER Was Specifically Designed To  
**Dramatically Reduce Operator Exposure!**

## MistBLASTER Technology (patent applied for)

When the machine doors are closed our MistBLASTER creates a slight negative air pressure, which prevents mist from escaping from the machine enclosure. When the machining cycle ends and the coolant shuts off, MistBLASTER senses the "end of cycle" and speeds up for a preprogrammed time to greatly increase the rate of mist removal. Virtually no mist escapes and exposure to the operator is dramatically reduced.

## Reduces Operator Exposure

### *Unit Specifications:*

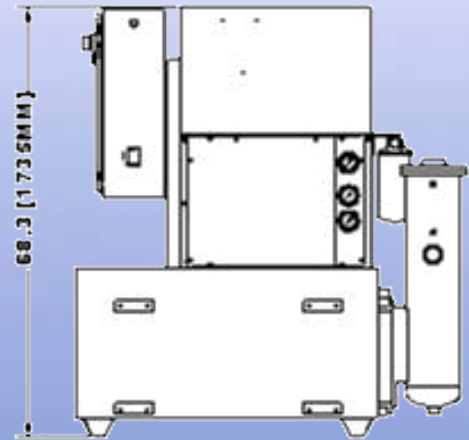

Max Meter <sup>3</sup> /Minute	34 (1200 cfm)
Amperage	10 amps @ 240 VAC
Remote Location	Yes
Liquid Return	Yes
Air Quality	Outstanding
Weight	205 Kg. (450 lbs)

"M" code controlled.

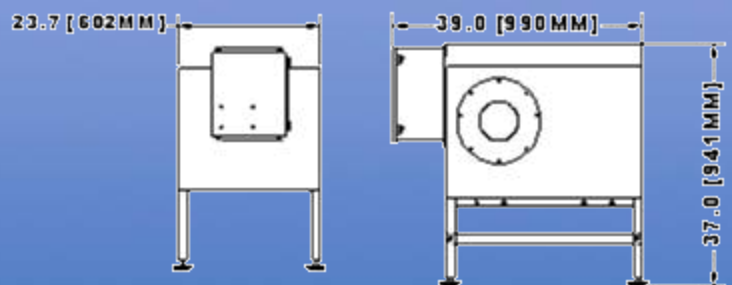

Available in either 230V or 460V  
and will plug directly into the ChipBLASTER  
unit (if mounted.)

### 3 Mounting Options:

- On Top of ChipBLASTER unit
- On floor stand
- Hung from ceiling (via eye hooks)

Shown Mounted on a ChipBLASTER

Stand Alone with Optional Stand

ISO 9001
